

POWDER LOOSE LICK

AIM

GRAZEMAX

Beetguard (CS) LK

Method

Deliver Ad Lib, Via Containers

Dose Rate

Cattle: 100 g/h/day | Sheep: 20 g/h/day

Unit Size

25 Kg or 1,000 Kg Bulk Bag

GREEN FEEDING MANAGEMENT

For Cattle & Sheep. Advanced risk protection for animals grazing Fodder Beet. Grazemax Beetguard's unique dual action Buffer, Mineral & Carbohydrate formulation technology simultaneously reduces the risk of acidosis whilst delivering the sophisticated nutrient profile required to optimise animal performance. Grazemax Beetguard is a concentrated blend of nutrients including targeted Buffers, Minerals & Vitamins to be made available at all times to grazing animals. Also contains Moisture Resistant Technologies for even greater peace of mind.

GRAZEMAX Beetguard (CS) LK

FAQ'S

Does Grazemax BeetGuard come in Block form? No. The reason for this is simple: Loose Lick supplements can provide much better value for money than Blocks because powders have little or no requirement for the use of binders or fillers.

How do I manage even intake across the mob? There are a number of ways to optimise even intake. The product should be introduced gradually, by only putting out sufficient product to supply three days dosage at a time. Ensuring the right ratio of containers to animals and the use of mesh to restrict intake are also important techniques. Contact an Accredited Animal Innovations Advisor to discuss.

What sort of container should I use, and how many? Dedicated troughs are great, but for a low cost solution we suggest old tyres (halved longitudinally), top and/or bottom third of a 205 ltr drum, or half a plastic 20 ltr drum. Place containers near water, at the rate of one container per 15 Cattle, or 1 container per 50 Sheep.

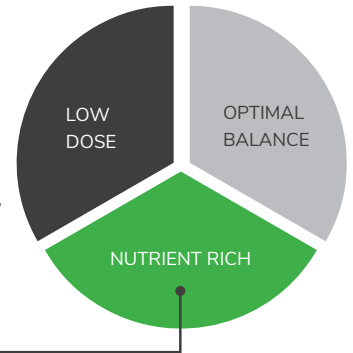

Does it matter if Grazemax Beetguard gets wet? The moisture resistant technologies used in Grazemax Beetguard are highly effective at keeping the product dry in wet conditions by forming a thin "weatherproof" crust. However it is critical to drill a few small holes in the bottom of containers to allow excess water to drain away.

Will it matter if I'm already feeding other supplements? It may. We assume that if you're using Grazemax Beetguard, you've already spoken to an Accredited Animal Innovations Advisor to ascertain its suitability for your application.

Is there a quick way to determine how much to put out? That's easy! For Cattle, allow 100 g /h/day, or 10 kilograms per 100 animals per day. For Sheep, allow 20 g/h/day, or 2 kilograms per 100 animals per day.

Is there any time during the year when I SHOULDNT feed this product? From the point of view of optimising productivity, we suggest you don't use Grazemax Beetguard under dry feeding conditions. Grazemax Dry Lick is more appropriate for that application.

For Cattle and Sheep grazing fodder beet. A concentrated powder lick for where risk of Acidosis is high. Includes Calcium, Magnesium, Phosphorous, Sulphur, Copper, Cobalt, Selenium & Zinc. Also contains moisture resistance Technologies.

Composition Nutrient Sources

Inorganic Minerals and/or Mineral Chelates, Vegetable Oil and/or Molasses, Starches and/or Di- and/or Polysaccharides.

Nutrient Profile

Macro Minerals	Calcium, Magnesium, Phosphorous, Sodium, Sulphur.
Trace Elements	Cobalt, Copper, Iodine, Selenium, Zinc.
Vitamins	Vitamins A, E and B Group.
Other	Moisture Resistance Technologies, Calibrated Buffers.

Calculated Analysis (M.F.)

Crude Protein	%	1.20
Crude Fat	%	1.00
Carbohydrate	%	23.00
Calcium	%	18.00
Magnesium	%	7.40
Phosphorous	%	1.75
Sodium	%	0.80
Sulphur	%	2.40
