

POWDER LOOSE LICK

AIM

GRAZEMAX Sorghum+ (CS) LK

Method

Deliver Ad Lib, Via Containers

Dose Rate

Cattle: 110 g/h/day | Sheep: 40 g/h/day

Unit Size

25 Kg or 1,000 Kg Bulk Bag

GREEN FEEDING MANAGEMENT

For Cattle & Sheep. Advanced risk protection for Sorghum and specialty forage crops. This unique dual-action Sulphur & Carbohydrate formulation technology simultaneously reduces the risk of prussic acid and/or nitrite challenge whilst delivering the sophisticated nutrient profile required to optimise animal performance. Grazemax Sorghum+ is a concentrated blend of nutrients including targeted Carbohydrates, to be made available at all times to grazing animals. Also contains Moisture Resistant Technologies for even greater peace of mind.

GRAZEMAX Sorghum+ (CS) LK

For Cattle & Sheep grazing Sorghum forage. A low dose powder lick for use in environments where nutrients including Calcium, Magnesium, Phosphorous, Sulphur, Copper, Cobalt, Selenium & Zinc may be limited. Also contains moisture resistance Technologies.

FAQ'S

Does Grazemax Sorghum+ come in Block form? No. The reason for this is simple: Loose Lick supplements can provide much better value for money than Blocks because powders have little or no requirement for the use of binders or fillers.

How do I manage even intake across the mob? There are a number of ways to optimise even intake. The product should be introduced gradually, by only putting out sufficient product to supply three days dosage at a time. Ensuring the right ratio of containers to animals and the use of mesh to restrict intake are also important techniques. Contact an Accredited A.I.M. Advisor to discuss.

What sort of container should I use, and how many? Dedicated troughs are great, but for a low cost solution we suggest old tyres (halved longitudinally), top and/or bottom third of a 205lt drum, or half a plastic 20lt drum. Place containers near water, at the rate of one container per 15 Cattle, or one container per 50 Sheep.

Does it matter if Grazemax Sorghum+ gets wet? The moisture resistant technologies used in Grazemax Sorghum+ are highly effective at keeping the product dry in wet conditions by forming a thin "weatherproof" crust. However it is critical to drill a few small holes in the bottom of containers to allow excess water to drain away.

Will it matter if I'm already feeding other supplements? It may. We assume that if you're using Grazemax Sorghum+, you've already spoken to an Accredited A.I.M. Advisor to ascertain its suitability for your application.

Is there a quick way to determine how much to put out? That's easy! For Cattle, allow a maximum of 110 grams / h / day, or 11 kilograms per 100 cattle per day. For Sheep, allow a maximum of 40 grams / h / day, or 4 kilograms per 100 sheep per day.

Is there any time during the year when I SHOULDNT feed this product? From the point of view of optimising productivity, we suggest you don't use Grazemax Sorghum+ under dry feeding conditions. A.I.M. Stubblemax products are more appropriate for that application.

Composition Nutrient Sources

Inorganic Minerals and/or Mineral Chelates, Vegetable Oil and/or Molasses, Starches and/or Di- and/or Polysaccharides.

Nutrient Profile

Macro Minerals	Calcium, Magnesium, Phosphorous, Sodium, Sulphur.
Trace Elements	Cobalt, Copper, Iodine, Manganese, Selenium, Zinc.
Vitamins	Vitamins A, D, E and B Group, plus advanced forms of Vitamins A, D, E, Biotin, B5, B6 and Folic Acid.
Other	Moisture Resistance Technologies.

Calculated Analysis (M.F.)

Crude Protein	%	1.00
Crude Fat	%	1.00
Carbohydrate	%	15.70
Calcium	%	10.90
Magnesium	%	9.00
Phosphorous	%	1.10
Sodium	%	4.60
Sulphur	%	21.80
