

POWDER LOOSE LICK

**AIM**

## GRAZEMAX Ultra (CS) LK

### Method

Deliver Ad Lib, Via Containers

### Dose Rate

Cattle: 75-80 g/h/day | Sheep: 25-30 g/h/day

### Unit Size

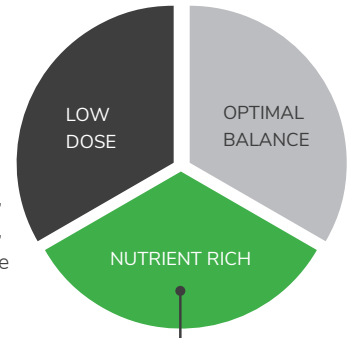

25 Kg or 1,000 Kg Bulk Bag

## GREEN FEEDING MANAGEMENT

**For Cattle & Sheep.** Lush, fast growing pastures and fodder crops often lack the Mineral and Carbohydrate profile required to optimise animal growth and feed efficiency. These nutrient imbalances also frequently contribute to an increase in the rate of Clinical and Sub Clinical Bloat, scours and Staggers. Grazemax Ultra is a concentrated, low dose powder lick for use with Cattle and Sheep grazing green, fast growing pasture/fodder crops where the supply of certain critical nutrients may be limited. Also contains Moisture Resistance Technologies.

# GRAZEMAX Ultra (CS) LK

For animals grazing green, fast growing or lush pastures / forage crops. A low dose powder lick for use in environments where nutrients including Calcium, Magnesium, Phosphorous, Sulphur, Copper, Cobalt, Selenium & Zinc may be limited. Also contains moisture resistance Technologies.

## FAQ'S

**Does Grazemax Ultra come in Block form?** No. The reason for this is simple: Loose Lick supplements can provide much better value for money than Blocks because powders have little or no requirement for the use of binders or fillers.

**How do I manage even intake across the mob?** There are a number of ways to optimise even intake. The product should be introduced gradually, by only putting out sufficient product to supply three days dosage at a time. Ensuring the right ratio of containers to animals and the use of mesh to restrict intake are also important techniques. Contact an Accredited A.I.M. Advisor to discuss.

**What sort of container should I use, and how many?** Dedicated troughs are great, but for a low cost solution we suggest old tyres (halved longitudinally), top and/or bottom third of a 205lt drum, or half a plastic 20lt drum. Place containers near water, at the rate of one container per 15 Cattle, or one container per 50 Sheep.

**Does it matter if Grazemax Ultra gets wet?** The moisture resistant technologies used in Grazemax Ultra are highly effective at keeping the product dry in wet conditions by forming a thin "weatherproof" crust. However it is critical to drill a few small holes in the bottom of containers to allow excess water to drain away.

**Will it matter if I'm already feeding other supplements?** It may. We assume that if you're using Grazemax Ultra, you've already spoken to an Accredited A.I.M. Advisor to ascertain its suitability for your application.

**Is there a quick way to determine how much to put out?** That's easy! For Cattle, allow a maximum of 80 grams / h / day, or 8 kilograms per 100 cattle per day. For Sheep, allow a maximum of 30 grams / h / day, or 3 kilograms per 100 sheep per day.

**Is there any time during the year when I SHOULD'N'T feed Grazemax?** From the point of view of optimising productivity, we suggest you don't use Grazemax Ultra under dry feeding conditions. Stubblemax is a more appropriate product for that application.

## Composition Nutrient Sources

Inorganic Minerals and/or Mineral Chelates, Vegetable Oil and/or Molasses, Starches and/or Di- and/or Polysaccharides.

## Nutrient Profile

Macro Minerals	Calcium, Magnesium, Phosphorous, Sodium, Sulphur.
Trace Elements	Cobalt, Copper, Iodine, Manganese, Selenium, Zinc.
Vitamins	Vitamins A, D, E and B Group, plus advanced forms of Vitamins A, D, E, Biotin, B5, B6 and Folic Acid.
Other	Moisture Resistance Technologies.

## Calculated Analysis (M.F.)

Crude Protein	%	1.80
Crude Fat	%	1.00
Carbohydrate	%	16.30
Calcium	%	13.60
Magnesium	%	11.00
Phosphorous	%	1.40
Sodium	%	5.70
Sulphur	%	7.30
