

POWDER LOOSE LICK

**AIM**

GRAZEMAX

**Xtreme (CS) LK**

**Method**

Deliver Ad Lib, Via Containers

**Dose Rate**

Cattle: 40-50 g/h/day | Sheep: 10-20 g/h/day

**Unit Size**

25 Kg or 1,000 Kg Bulk Bag

## GREEN FEEDING MANAGEMENT

**For Cattle & Sheep.** Lush, fast growing pastures and fodder crops often lack the sophisticated nutrient profile required to optimise animal health and performance. When production challenge is high, nutritional imbalances can cause clinical symptoms like Grass Tetany, Milk Fever & Bloat. Grazemax Xtreme Lick is a comprehensive blend of Macro & Micro minerals - including Magnesium, Vitamins and Carbohydrates - specifically formulated to help optimise the supply of those key nutrients animals require to maintain health and productivity when grazing poorly balanced or challenging feeds. Also contains advanced Moisture Resistance Technologies.

# GRAZEMAX Xtreme (CS) LK

## FAQ'S

**Does Grazemax Xtreme come in Block form?** No. The reason for this is simple: Loose Lick supplements can provide much better value for money than Blocks because powders have little or no requirement for the use of binders or fillers.

**How do I manage even intake across the mob?** There are a number of ways to optimise even intake. The product should be introduced gradually, by only putting out sufficient product to supply three days dosage at a time. Ensuring the right ratio of containers to animals and the use of mesh to restrict intake are also important techniques. Contact an Accredited A.I.M. Advisor to discuss.

**What sort of container should I use, and how many?** Dedicated troughs are great, but for a low cost solution we suggest old tyres (halved longitudinally), top and/or bottom third of a 205 ltr drum, or half a plastic 20 ltr drum. Place containers near water, at the rate of one container per 15 Cattle, or one container per 50 sheep.

**Does it matter if Grazemax Xtreme gets wet?** The moisture resistant technologies used in Grazemax Xtreme are highly effective at keeping the product dry in wet conditions by forming a thin "weatherproof" crust. However it is critical to drill a few small holes in the bottom of containers to allow excess water to drain away.

**Will it matter if I'm already feeding other supplements?** It may. We assume that if you're using Grazemax Xtreme, you've already spoken to an Accredited A.I.M. Advisor to ascertain its suitability for your application.

**Is there a quick way to determine how much to put out?** That's easy! For Sheep, allow a maximum of 10-20 grams Grazemax Xtreme per head per day (or 1-2 kilograms per 100 Sheep per day). For Cattle, allow 40-50 grams Grazemax Xtreme per head per day (or 4-5 kilograms per 100 Cattle per day).

**Is there any time during the year when I SHOULD'N'T feed Grazemax Xtreme?** From the point of view of optimising productivity, we suggest you don't use Grazemax under dry or stubble feeding conditions. Stubblemax is a more appropriate product for that application.

For animals under production challenge grazing green fast growing or lush pastures / forage crops. A low dose Lick for use in environments where nutrients including Calcium, Magnesium, Phosphorous, Sulphur, Copper, Cobalt, Selenium & Zinc may be limited. Also contains moisture resistance Technologies.

## Composition Nutrient Sources

Inorganic Minerals and/or Mineral Chelates, Salt, Vegetable Oil and/or Molasses, Starches and/or Simple Sugars.

## Nutrient Profile

Macro Minerals	Calcium, Magnesium, Sodium.
Trace Elements	Cobalt, Copper and Selenium, plus advanced forms of Zinc.
Vitamins	Vitamins A, D and B Group, plus advanced forms of Vitamins A, D, E, Biotin, B5, B6 and Folic Acid.
Other	Moisture Resistance Technologies.

## Calculated Analysis (M.F.)

Crude Protein	%	1.26
Crude Fat	%	1.03
Carbohydrate	%	24.00
Calcium	%	4.20
Magnesium	%	24.95
Phosphorous	%	0.02
Sodium	%	7.20
Sulphur	%	0.128
